

Recycle Printer Cartridges

Activity

10

Activity

The THINKGREEN Cartridge Collection Program is a community-based program that allows businesses and schools to collect used inkjet and laser print cartridges from the community and bring them to one convenient collection point. The environmental fund-raising program lets you collect used print cartridges, earn funds, protect the environment and win awesome prizes!!! See

www.thinkgreen.com.

Role and Responsibilities

A designated student in each class should be responsible for taking the used cartridges to the school drop off location. The number of cartridges collected should be recorded at the same time as the audit is conducted.

Stakeholder Involvement

- Secondary and elementary schools
- Community business could be invited to participate and give their used cartridges to the school.
- Parents could pick up cartridges and deliver to depot.

Mentorship

Students can play a key role with their parents by informing them of the cost savings and environmental effects of recycling printer cartridges. Students collect them and bring them to school.

Role of Class

All classes will participate by having printer cartridges sent to the school collection depot.
